

Interacting with Dialogs in MVVM

Thomas Claudius Huber

MICROSOFT MVP (WINDOWS DEVELOPMENT)

@thomasclaudiush www.thomasclaudiushuber.com

Module Outline

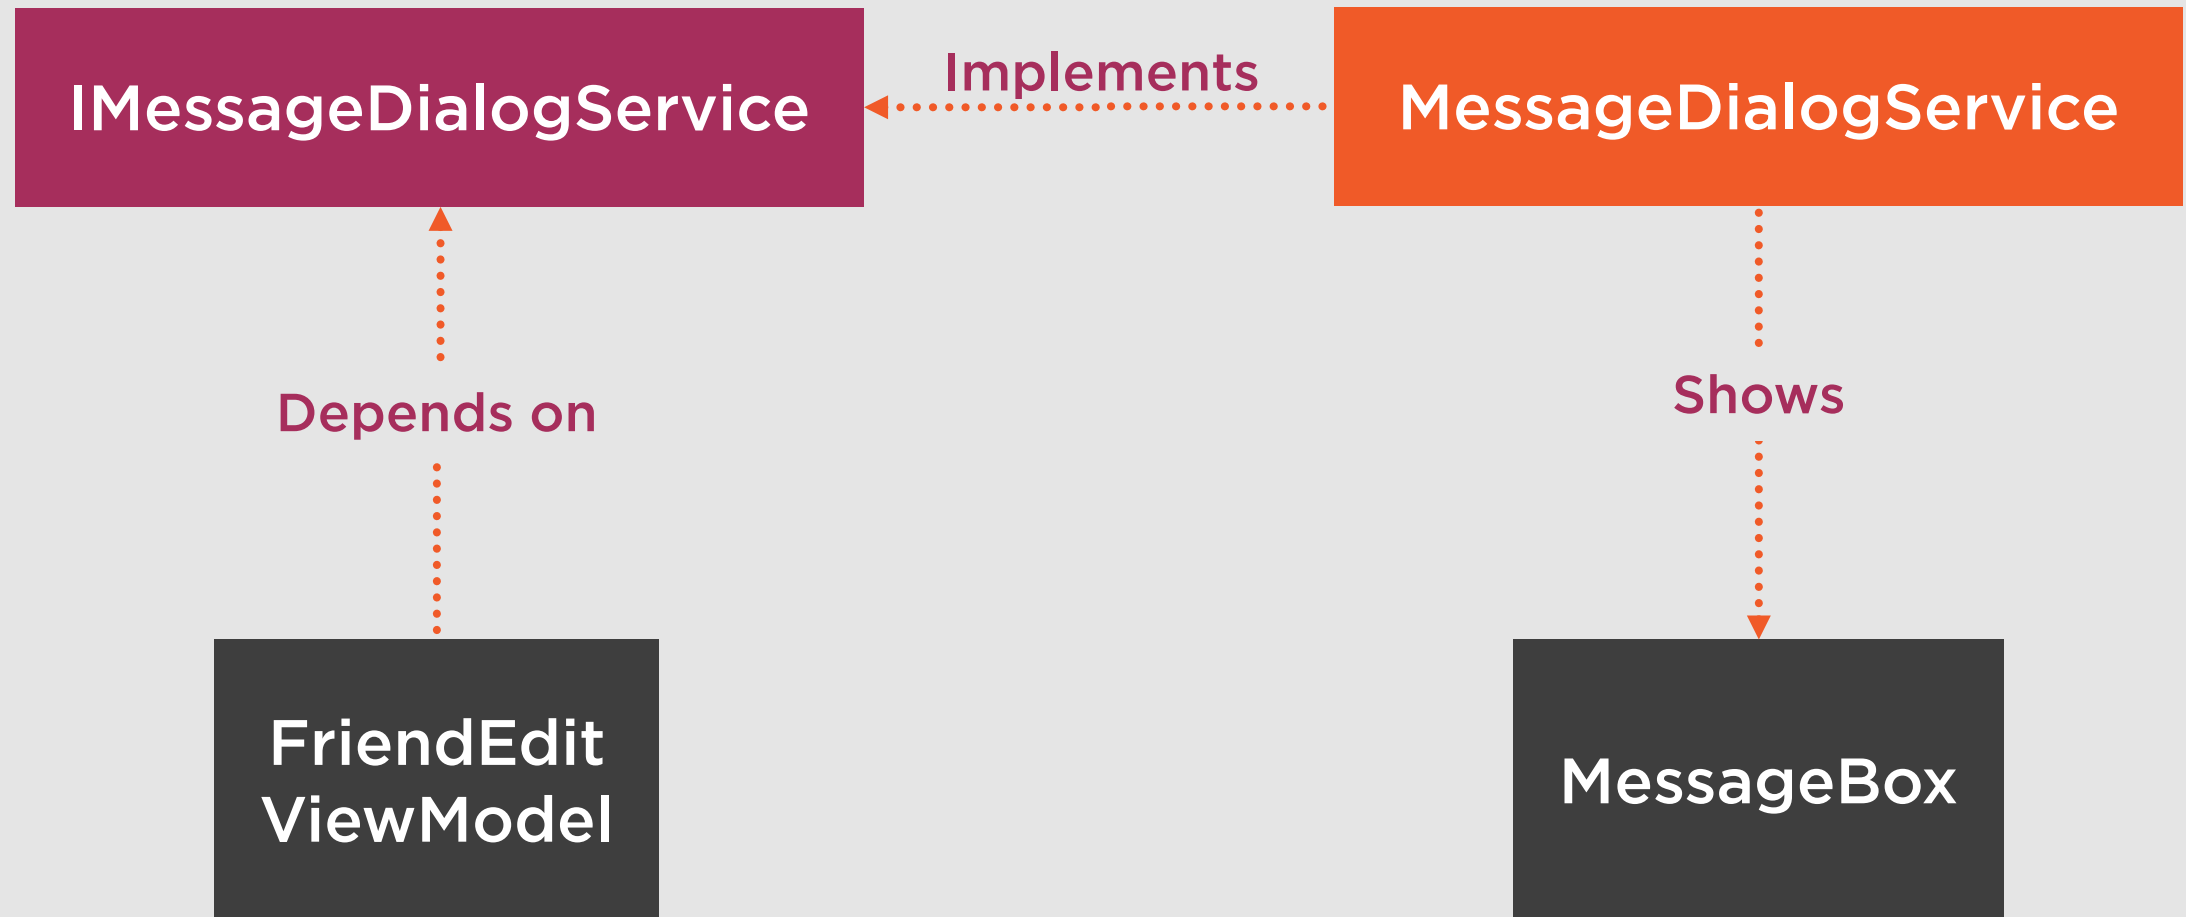

The problem with dialogs
in the ViewModel

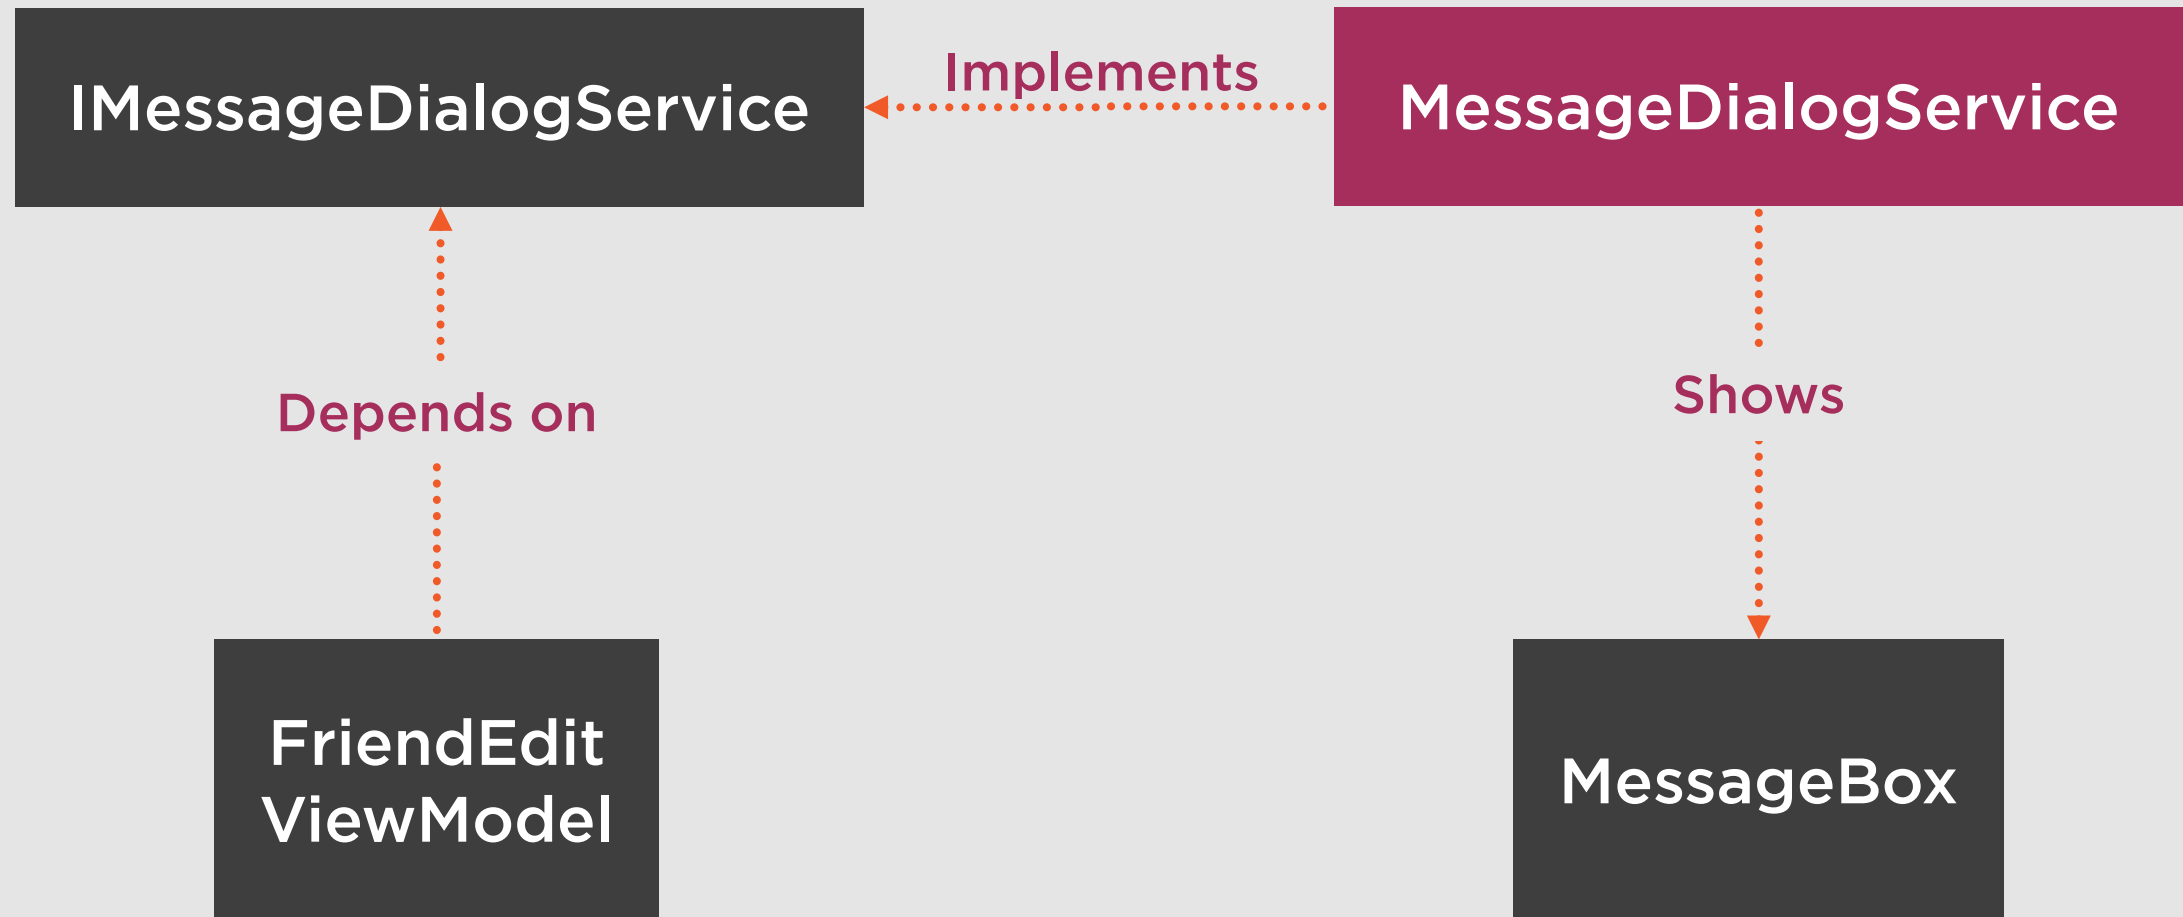

Display a dialog when deleting a Friend

Display a dialog when closing a tab

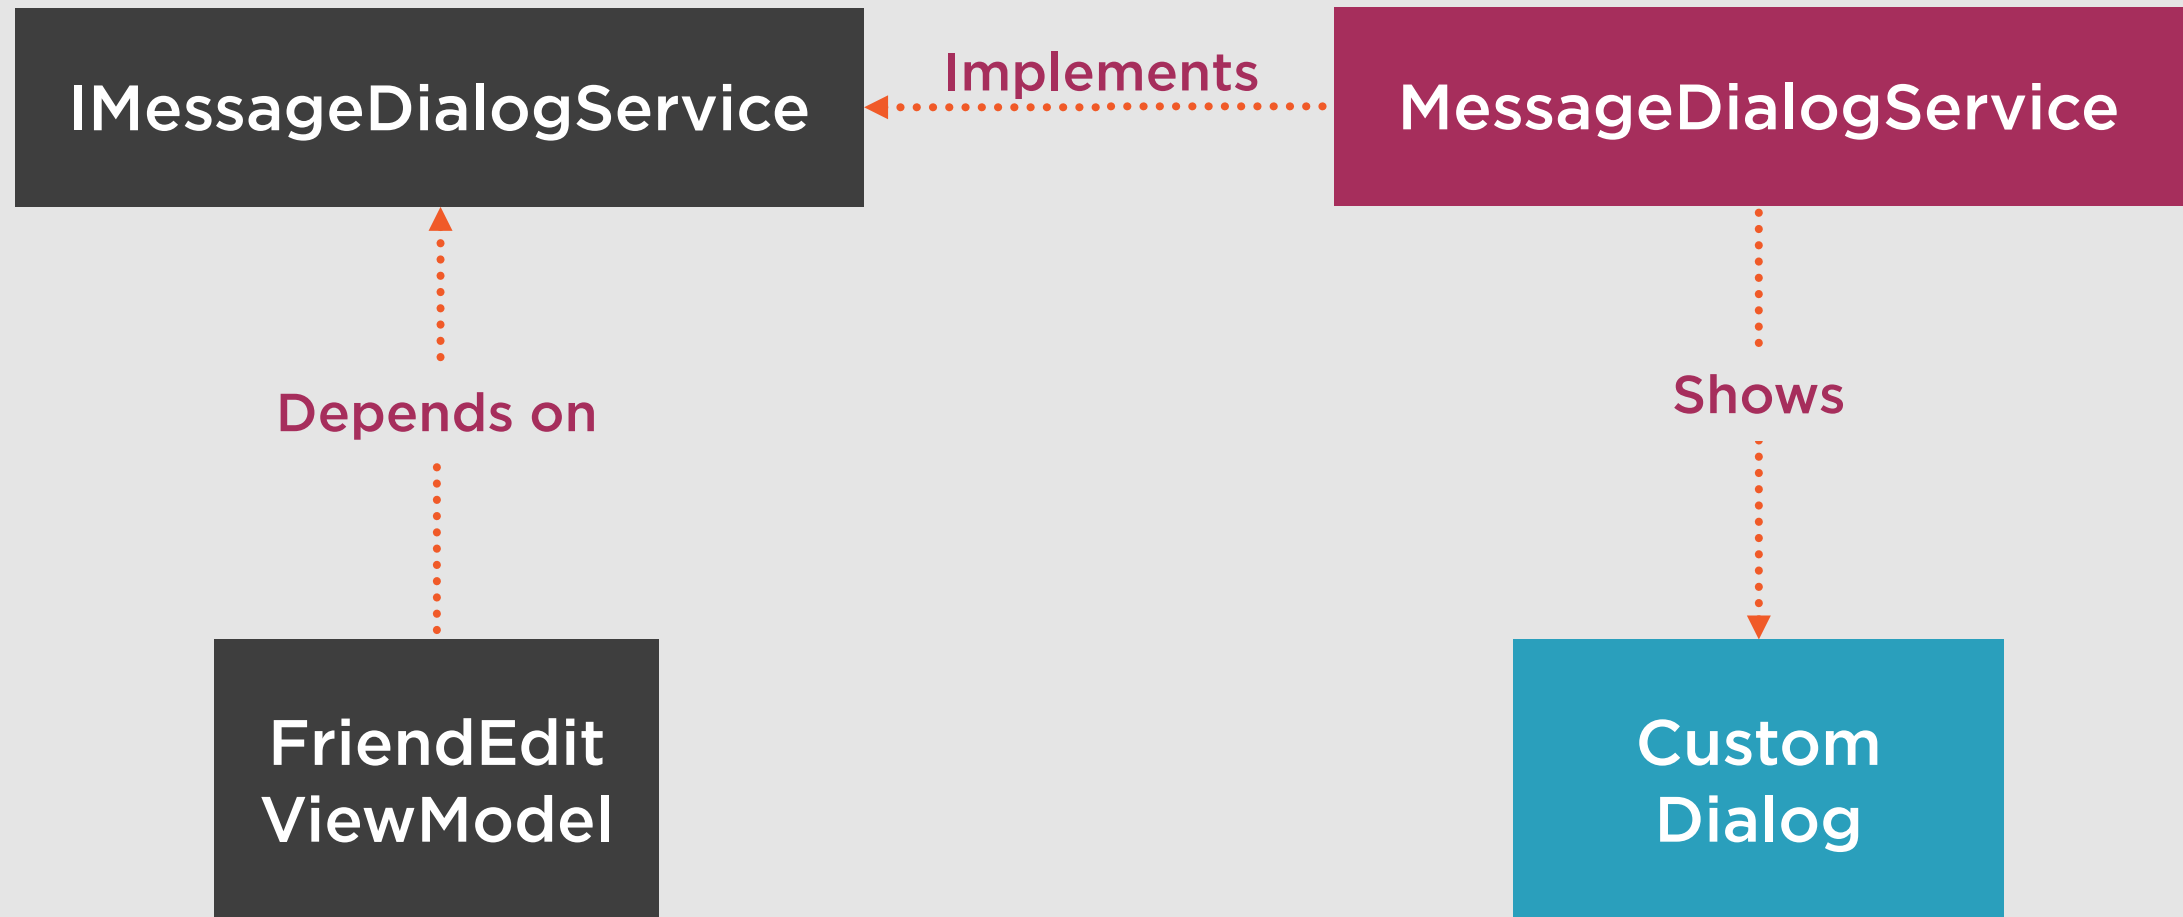

Introduce the IMessageDialogService-interface

Implement the MessageDialogService

Use a Custom Dialog

Course Summary

Writing testable ViewModels means abstracting away dependencies

With Unit Tests you can implement your logic without having the dependencies

Code without tests is bad code

Which courses you could watch next?

- WPF and MVVM: Advanced Model Treatment
- Mocking With Moq
- Several Unit Testing courses
